"Let the children come unto me, do not stop them; for it is to such as these that the kingdom of God belongs." Holy Bible.

Foundation Day
Special Edition

Glorious Years of Excellence

A JOURNEY OF 40 YEARS

St. Mary's Public School, is celebrating its 40th foundation day on 3rd July 2023. To pen down this journey in few words is a herculian job, starting with less than 100 students and 7 staff in a rented building at Madangir and reaching to this level i.e 3 branches with 4000 students and almost 280 staff may be an imaginary story for many. But it is a reality and that is SMPS today.

Looking back to 40 years, the journey with all its odds and obstacles, stones and thrones, hurdles & problems, trails and turbulances, everything comes to my mind as it happened yesterday.

At this moment, I would like to thank almighty for everything, Mother Mary our heavenly Patroness for her intercession and enlightenment at the time of my difficulties. Also, I would like to thank the people who in one way or other co-operated and helped me to build this institution to this level.

Also, I would like to thank my teaching and non teaching fraternity for the dedication and cooperation, and loyalty towards the institution.

At this juncture, I also would like to tell you that couple of days back I had the luck to meet and get the blessing of the Holy see, POPE Francis, the spiritual head of almost 140 crores of Catholic Christians, all over the world on 22-06-2023. I do believe, it as a blessings from above (almighty) on this 40th year.

Dear Parents and Students, God has made us so strong, coupled with most powerful two hands, and if we work hard with determination we can make wonders in this world.

As informed you earlier we are planning to have this celebration at different levels, starting from July 3rd and ending on 25th Nov at Thyagraj Stadium. I request your full co-operation in this regard.

This is not the end of our journey, after every full stops as new sentence begin. Let us work together to make this educational institution an ideal one in every respect.

Dr. Thomas George
 Director

OUR ACHIEVERS

Class XII students **Akhilesh Nautiya, Akash Sharma, Ujjawal Chauhan, and Kritika Ghosh** brought honor to their school by securing Third Position in the IT Inter - school competition Innovatetrix. On May 4, 2023, Tagore International School Vasant Vihar held the event.

Khwaish of Class 12-F won **BEST MODEL PRIZE** in **MISS DELHI DIVA**. StarFace Modeling Agency organized the event on 30 April 2023

Nikita Dagar of Class VIII C (Neb Sarai) Won Silver Medal in Shankar's On The Spot Painting Competition 2022 Organized by Children's Book Trust

CHARITY

Last Quarter we have Contributed **Rs 88,000/-** towards various purposes like:

- ♦ Medical Aid ♦ Religious Institutions ♦ Education

HELLO! ZERO WASTE LIVING!

The world is drowning in trash. As a result, going Zero Waste has made its way into mainstream culture. Our **Eco Warriors** have taken some independent steps to reduce waste.

"We don't have to engage in grand, heroic actions to participate in change. Small acts, when multiplied by millions of people, can transform the world." Howard Zinn

My contribution towards Zero Waste living

Stop Hoarding

The excessive accumulation of items that are often unnecessary or unused, leads to the wastage of resources. I get assured my family members buy only what they need, I help my mother in purchasing vegetables for our instant use and not for weeks in advance. This allows less wastage of raw produce. My habit of making meal plans in advance also helps my family in the total utilization of produce, also we buy dry products with long shelf life in bulk which cut down on single-use plastic packing.

Riya XII- E

Root to Shoot Cooking

Root-to-shoot cooking is not only kind to the environment but to our pockets too as it makes vegetables go a long way. It helps one to become more creative in the kitchen and experiment with different tastes, textures, and cooking techniques. Save vegetable peels and make stock with some whole spices which can be used in cooking as a substitute to just plain water, this will reduce waste and uplift the flavour of food, one can store it for over 4 days in the freezer.

Palak Aggarwal XII- B

Garbage gardening

A kitchen composting bin is a must-have in every house. I have made one at my home. Every single piece of discarded vegetables and fruits belongs to that compost bin. We can grow flowers and edibles using kitchen waste. It's a fun way to recycle and start new plants on the windows by using household waste like eggshells, stale bread, waste paper, used tea leaves/tea bags, by-products from root nuts, or cuttings. It is a promising way to recycle waste into wealth.

Sharvan XI- D

Reduce Single-Use Items

Our planet is choking on plastic. A systemic change is needed to stop the flow of plastic waste. I have started avoiding single-use items such as plastic water bottles, flasks, wrapping paper, lumbers, disposable cutlery, and straws. Instead, I opt for reusable alternatives like a refillable pen, water bottle, lunchbox with reusable containers, and metal or bamboo utensils. Besides, I motivate my family members and friends also to do so.

Simran XI- C

Repair and Maintenance

Regular maintenance is essential not only for the smooth running and prolonging of the useful life of equipment but also for preventing harm to the environment. I love to extend the lifespan of my belongings by repairing them when possible and trying to maintain them properly. Often items can be fixed rather than discarded and replaced. I advise everyone to invest in the longevity of their possession and develop the skills to repair and restore items.

Daksh Vaid XI- B

Eco-friendly cleaning

I have made my parents not purchase conventional cleaning products as they are full of harmful endocrine disruptors and other chemicals that leach into our sewage system waterways and bodies. Fortunately, my science lessons have empowered me to make my own eco-friendly cleaning products by combining baking soda with lemon juice and vinegar. It is very easy and fun to clean my home and furniture with Eco-friendly cleaning.

Yashvi Tyagi XI- A

Donate to the needy

There are various ways to be eco-friendly as we edit our possessions. We can find items in our homes to repurpose or find an organization that will benefit from what we are discarding and donating it to them. Instead of disposing of my old clothes, bags, books, shoes, sports equipment, etc, I try to donate to the needy / charity or second-hand stores. This helps in supporting thrift stores and reusable culture. It also minimizes the waste of my home.

Annu Kumari X- A

Start Riding

Using a bicycle rather than a scooter or bike has several positive impacts on the environment. It is the most energy-efficient mode of transportation. By incorporating cycling into my daily routines and prioritizing bicycle-friendly policies, I am trying to make a significant contribution to environmental sustainability. The riding cycle not only reduces carbon emissions and conserves resources but also promotes healthier and more livable communities.

Mayank X- B

धरती माता

एक-एक पेड़ सब लगाए,
पेड़ करोड़ों ही उग आए ॥
धरती हरी भरी हो जाए
फिर रोगों को दूर भगाए ॥

काटे अनगिनत पेड़ मनुष्य ने,
लालच ने उसको उकसाया ॥
अच्छे सच्चे मित्र पेड़ हैं,
इतना नहीं समझ वह पाया।

अरे! कुल्हाड़ी को तुम रोको,
धरती नष्ट अब होती है ॥

जब जब इंसान पेड़ काटता,
तब तब धरती माता रोती है ॥

पेड़ है धरती माता की शान।

इनका करो तुम मान सम्मान ॥

ना दो प्रदूषण को बढ़ावा
बनो धरती माँ का सहारा ॥

आओ अब हम पेड़ बचाएँ

धरती माँ को स्वर्ग बनाएँ

- वसुंधरा गुप्ता VIII A (Devil)

Importance of G20 for INDIA

G20 is not just a summit or conclave, Rather it is a medium to spur growth and sustainability.

This summit is crucial not just from one perspective,

But instead have manifold benefits including financial stability.

Being a WTO member, India leads in negotiation skills,

Which is a significant factor on which any nation builds.

Our banking sector has also undergone various reforms,

Solar Alliance and Clean Energy have helped India to transform.

Initiatives like Digital India, and Make in India improve our digital infrastructure

Thus helping in shaping and strengthening global architecture.

G20's presidency would showcase India's growing influence on the global stage,

Hence shifting its reputation and reinforcement relations upstage.

India always wanted to escalate its development and pride,

So this presidency would advance its prospects vertically and wide.

A WONDERFUL WORLD OF SPICES

Spices enhance flavor and color to food. They are also widely used in Ayurvedic medicine. Spices are also high in antioxidants, heart protection, fitness regeneration, anti-inflammation, and have a variety of health benefits. Spices from all over the world have their own distinct essence, flavoring color, and aroma. Spices are essential component of human life. Seeds, roots, fruit barks, and other plant substances are used as seasoning. Turmeric fingers, cumin, coriander, black-white pepper, fennel and mustard are all popular around the world. Classic Indian home-cooked food is often thought to be one of the healthiest foods consumed around the world due to its abundance of spices. India is the world's largest producer of spices and the coastal state Kerala is called the land of spices. The availability of abundant natural resources and favourable climate makes it possible for the growth of spices in India. The secret to Indian food flavour lies in the spices.

RISING TOGETHER, STRONGER THAN EVER

PROFOUND IMPACT OF SCHOOL: NURTURING LEADERS

I, Satdev Prasad Sah, father of Yaksh Sah of class VII-C is thankful and feel privileged that my son is a St. Marian. During his initial days of school life he was not willing to go to school but now he has developed habit of going to school everyday. Earlier he was very shy and apprehensive to mix with students but gradually he developed interpersonal skills and started enjoying his friends company hence his yearly report card also reflected his progress in academic and other activity skills.

It's important to note that the school system and its effectiveness

can vary across different educational institutions and regions. A supportive and nurturing school environment, competent teachers, and a well-rounded curriculum can greatly contribute to a student's overall development and prepare them for future challenges and opportunities.

For me, St. Mary's Public School is not only more than simply an educational institution, but it is also my son's second home which he established during his childhood. It is a family of wonderful friend, outstanding teachers, and respected principal and other school staffs. The school system fosters the development of independence and responsibility in students. They learn to manage their time, complete assignments, meet deadlines, and take ownership of their learning. These skills are essential for their personal and professional success beyond school. Finally, my school has helped me in the development of self-discipline and punctuality in my life, School has given me basic education and developed my skills like drawing and painting, public speaking and many more. Some of the qualities, which I developed like, Self-Discipline, Punctual, Team Player, Confident, Responsible etc.

On the occasions of 40th year foundations day of the School, I would like to congratulate Director Sir, Principal Ma'am, Administrators, Teachers and other staff members for the glorious completion of 40 years of this temple of education.

Mr. Satdev Prasad Sah F/o Yaksh Sah VII-C (Neb Sarai)

"FOUR DECADES OF EXCELLENCE: A LEGACY OF QUALITY EDUCATION"

Education is the cornerstone of society, the catalyst for personal growth, and the foundation upon which dreams are built. As we commemorate the completion of 40 years of our esteemed school's journey, we reflect upon the countless lives transformed, the impact made, and the remarkable achievements that have unfolded within our walls. This significant milestone serves as a testament to the unwavering commitment to excellence, innovation, and the relentless pursuit of nurturing young minds. Join us as we delve into the remarkable story of our school and the profound influence it has had on shaping stars and unlocking boundless futures.

Over the course of four decades, our school has evolved into an institution that has left an indelible mark on the educational landscape. From humble beginnings, it has grown to become a beacon of academic brilliance, fostering an environment that cultivates intellectual curiosity, creativity, and critical thinking. The tireless efforts of our visionary Director Sir, Dr. Thomas George, and iconic Principal Mrs. Daisy Thomas have propelled our institution to new heights, fostering an atmosphere of excellence that extends beyond the classroom walls.

At the heart of our school's success lies the students—the bright young minds who have stepped through our doors over the years. Our school has provided a nurturing environment that embraces diversity, encourages exploration, and inspires students to reach for the stars. Through a comprehensive curriculum, enriched extracurricular activities, and a focus on holistic development, we have strived to empower our students with the knowledge, skills, and values necessary to excel in an ever-changing world.

Forty years of dedicated service to education is no small feat. Our school's journey stands as a testament to the transformative power of education and the profound impact it has on shaping individuals and communities. As we reflect upon the milestones achieved and the lives touched, we recommit ourselves to the pursuit of excellence, innovation, and creating an environment where every student can shine. With steadfast resolve, we look forward to continuing our mission of Imparting Quality Education.

Mrs. Anita Sharma English Teacher and Editorial Member (Sainik Farm)

MANY BEAUTIFUL THINGS ARE ONLY FELT SCHOOL IS A BUILDING WHICH HAS FOUR WALLS WITH TOMORROW INSIDE.

St. Mary's Public School is a recognised and honourable school which is known for its discipline, sincerity and charity. Discipline here makes student perfect in every field. My child joined this school in the year 2017 in class 2nd. I was a bit scared, but once enrolled, I felt proud of my decision. I observed him growing and till now the improvement in him is very evident. Teachers always try their best to teach students every single topic with full potential. They encourage students and bring out their hidden talents. My child who was little introvert got rid of his hesitation and started engaging himself in school activities.

As a parent, I feel extremely good and secure that my child is the part of this school.

Thanks, you for being an important part in our child development.

Mrs. Shivani
Mother of Nishant- VII B Devi

A PARENT'S JOURNEY THROUGH THE SCHOOL YEARS

I, Mala Khatri, mother of Ipshita Khatri a student of class 11C. My daughter has been a student of St. Mary's school for 12 years and both of us have developed a strong bond with it. As a parent, I am thrilled to commemorate the completion of 40 remarkable years of our beloved School. Over the years this institution has shaped the lives of countless children and has left a remarkable mark on our community. I am happy with the school and proud to see how my kid has been developing her ability to learn new things and finding the will to excel in her academics and other extracurricular activities.

My 12 years at St. Mary's Public School have been wonderful. Their teaching style encourages students to put their best efforts into scholastic and co-scholastic activities, and their parental compassion and desire to teach pupils about the outside world is the cherry on the top. It feels more like I'm sending her to another home in the morning than I am sending her to school, where she will learn more things like how to respect our elders and act appropriately in public. I made this decision of choosing St. Mary's for my daughter and since then I never looked back. It makes me pleased to see her grow and learn from highly qualified mentors. I'm quite grateful for it.

Thank you so much St. Mary's Public School for carving a diamond out of my daughter both now and in the future. Wishing you many great successful years ahead.

Mrs. Mala Khatri M/o Ipshita Khatri (XI-C)

TRANSFORMING EDUCATION: CELEBRATING 40TH FOUNDATION YEAR

Embarking on a teaching journey within a school setting has been a profoundly rewarding experience for me. It is my privilege that I delve into my personal teaching journey, describing the impact of my school environment and sharing my heartfelt emotions towards the 40th year of this institution that has become a second home to me. From my very first day as a teacher, I was embraced by a warm and welcoming school community. The administrators, fellow educators, and support staff created an environment of collaboration, support, and continuous learning. Working with students is the heart and soul of my teaching journey. The diverse array of young minds that enter my classroom each day brings me immeasurable joy and fulfillment. Witnessing their growth, enthusiasm, and eagerness to learn ignites a passion within me to provide them with the best education possible.

Today, we stand at the juncture where we are celebrating 40th year of school foundation day with a lot of enthusiasm and vigour. The school left no stone unturned to ignite young minds with knowledge and passion of learning also by incorporating and engaging an interactive teaching methods. Witnessing the spark of interest in a student's eyes and observing their intellectual growth is a constant reminder of the impact of education in their lives. The school's ethos of care, respect, and inclusivity has fostered a sense of belonging and security for everyone within its walls.

The school has provided opportunity to inspire students, witness their accomplishments, and contributed to their personal development - a place that symbolizes the transformative power of education and the importance of fostering a positive and inclusive community.

We all are proud to be associated with St. Mary's family. Wishing our school on its most auspicious day of 40th Foundation day infinite success in its future endeavours.

Mrs. Poonam Gaur
Teacher (Neb Sarai) Editorial Member

ACHIEVEMENTS OF TODAY IS A JOURNEY OF YEARS IMPARTING VALUABLE EDUCATION FOR 40 YEARS

A teacher is a compass that activates the magnet of curiosity, knowledge and wisdom.'

Teaching is a noble profession that comes with much responsibility and duty towards students. Teachers do not only teach and impart knowledge but inspire and motivate students for improvement to take important steps in life. They keep working to boost the confidence of students and persuade them to follow the right direction.

During the last fourteen years I experienced how one can enjoy teaching. I believe that a good workplace makes our life easier and happier.

Celebrating 40 years and watching it growing year by year successfully is a great delight for all those who are associated with it.

Since joined, I found St. Mary's an effective place that not only helped me as a professional but also helped to grow with technology and experience. It is certain that a dedicated staff and management will always inspire you to do better and the best and one can effectively pursue with what he/she wants.

Within 40 years a small plant St Mary's has become a tree and this flourishing growth is because it has been watered with dedication, passion and hard work. Managing Director Dr Thomas George and Mrs Daisy Thomas have become an inspiration to all. They taught desire, dedication and diligence can make your dreams come true. St Mary's is a combination of experience and innovation.

Administrator Mr Aby Alex and Vice Principal Mrs.Derlin are carrying teaching and technology together.

The four decades progress and prosperity is the result of all the members of St Mary's who have been directly or indirectly connected to it.

I learned many things from my experience. First, involving teaching in the development of professional standards. Similarly, it is essential that teacher's participation in designing methods for teaching system must be effective way of recognising soft skills and cultivating values to build a great nation.

Mrs. Sangeeta Joshi
Teacher (Devli) Editorial Member

Stepping Stone to Bidding Goodbye: A Beautiful Journey

A teacher is an architect of a society. There are a multiple roles that he/she plays throughout the journey to nurture the students. Not just with education, but with moral values, love, and understanding he/she builds the nation for tomorrow.

In my 19 years 8 months service, I never got to know how time passed and how we all travelled together so far on the roads of progress. As I stand here today, superannuating with contentment and pride in serving a wonderful organization. I that stepping onto feel that stepping onto a new tomorrow might be another difficult step to take. The first step is the hardest one, yet we all have to take many first steps on our road to success. On the outset, I might be retiring with certain numbers in my hand but the 19 years of service aren't just numbers. They're those pages of my life as a diary that will forever be embedded and cannot be skipped while recapping my life at any moment. It was a major part of my life, getting ready for school, taking the metro, hustling amongst the crowd, and chasing the busiest buses, yet maintaining calm while teaching. I see my progress in children, who've achieved their potential. Tomorrow, definitely there'll be a complete change in my life, for the schedule will be changed and a huge void will follow when I won't see my colleagues, students and instead of reporting to my authorities, I will be reporting about the undone chores at house or probably the unread books in my shelf. Yet, I shall carry my experience and love into the new world I'm about to enter. I am immensely grateful to all the authorities of my school, Thomas Sir; the strong pillar of St. Mary's family, Mathew Sir having been there from the very beginning as a guiding light, Aby Sir to have transformed the entire scenario of our school and taking it to new heights and, Derlin Ma'am; although in a very short span of time, she's moved us with her spirit of the present generation and amplitude of qualities and a vision of quality and sustainable education. My heartfelt gratitude to the whole team to have given me multiple opportunities and a special thanks to my colleagues for making me feel comfortable throughout the tenure. I've contributed a big part of my life here and as time passed, my roots deepened. I wish to see my school soar higher. I wish to see St. Mary's Public School as a blooming International School in the near future. My contribution to the school might have come to an end, but a message to all those who still have time with the institution - We all have an identity attached to the institution, let's make it stronger and more admirable. I thank everyone for giving me a very special memory to carry with me as I step into my second innings.

Mrs. Puspapala Mahapatra Asst. Teacher (Devli)

NATURE'S BLISS

Nature, a canvas painted with delight,
A tapestry of wonders, a captivating sight.
Sunlight dances on emerald leaves,
Whispering melodies, a symphony that weaves.

Mountains rise, touching azure skies,
Majestic peaks, where eagles fly.
The ocean roars, waves crashing free,
Unveiling treasures in its mighty sea.

Nature's masterpiece, a pure delight.
So let us cherish this precious place,
With love and reverence, in every space.
For in nature's embrace, we're forever blessed,
A sanctuary of peace, where we find rest.

Angel Gautam IX C

COME WITH ME

Mountains for my mansion
The forest for my pantry
The clouds for my carpet
The sky for my curtains
The sun for my candle
The wind for my chariot
In the company of eagles
Flying above fear
Floating above failures
Winging above worries
Gliding above gravity
Living above limits
Soaring to success
Come fly with me.

Pulkita Ojha XII-E

CAREER IN MATHEMATICS

What are the possible careers in mathematics?

Most employers may regard persons who use mathematics and statistics to tackle complex problems as highly skilled. If you are a skilled mathematician, you can pursue a variety of high-paying careers in a variety of industries all around the world. Banking, academia, business, research, analytics, insurance, and consultancy are some popular job paths for math majors.

What occupations are available with a mathematics degree?

With a mathematics degree, you can train for a teaching position or work in a variety of fields. You can considerably boost your job prospects by combining mathematics with specialty courses such as economics, statistics, computer science, applied mathematics, engineering, and mathematical sciences. Engineers with strong mathematical skills should consider positions in chemical engineering and electronic engineering, which need a thorough understanding of the subject. You can also work in business, science, social services, education, public sector projects, and specific technical sectors such as system design or risk analysis.

Top 15 Mathematical Careers (With a mathematics degree, you could pursue the following careers)

1. Market analyst
2. A mathematics instructor
3. A purchasing manager
4. An underwriter of insurance
5. Financial advisor
6. Financial analyst
7. Statistician
8. Financial analyst
9. Data analyst
10. Operations research analyst
11. Data scientist
12. Economist
13. Actuary
14. Mathematician
15. Budget analyst

LIFE WITHOUT INTERNET

Internet has already taken over each and every field. Just tell me an area where internet is not being used! Education, Industry, Finance, Defense, Teaching, Learning entertainment, online chats, messages, social media and communication. It is internet everywhere. The modern world will look worthless without internet. It has made human's life much more organized, systematic and awesomely efficient.

Imagine if internet gets disrupted for a day or a week. What will happen? You won't be able to fire up an instant messaging service to check up on friends. Everyone will be frustrated. Without the internet, we would be cut off from many of the resources and opportunities that it provides, making it harder to find information, communicate with others, and access goods and services.

You won't be able to log on to social networking sites and services like Whats App, Facebook or Twitter. Internet nowadays has become a necessity, so living without it even for a day will cause a lot of problems.

K-Pop & The Korean Sensation

During the lockdown, when everyone was still figuring out what was the pandemic all about, some people wanted to enjoy their time by trying new things. There, many of us came across the Word "K-pop".

K-pop, Korean Pop, originated in South Korea. This thing had an immense influence on the entire world, be it Western or Asian countries. Whenever we talk about K-pop, it is very hard not to mention the World's Famous Band Name, BTS! The success they got was not overnight but after years of hard work and now they're the World's Most Popular Band. BTS dearly known as Bangtan Sonyeondan or Bangtan Boys is a 7-member group consisting of RM, Jin, Suga, Jhope, Jimin, V & JK.

They're not only famous for their Music but for also working for highly respected organizations such as UNICEF, for their "Love Yourself" campaign. Moreover, they got recognition and were invited to the Blue House and White House. And as far as we think for awards, the list will go on, from getting nominated for Grammy's twice to American Music Awards and Billboard Awards. Clearly, they've earned huge respect and love from all over the world. The love they get doesn't have an age or a gender, we see a 90-year-old Grandma enjoying their Concert to a toddler, vibing to their music.

Their Fans, popularly known as ARMYs, love them beyond words and vice versa. Now, that the BTS group members are soon leaving for their military enlistment. Knowing this ARMYs are very sad but are Proud too. Here's my message for all the ARMYs.

"ARMYs, Let's grow old together, and let's wait for them"

Bhavana Mahi XI-F

Mom I love you
Mom I love you
For all that you do!
I will hug you and kiss you,
Because you love me too!
You feed me and need me,
You teach me to play!
So, smile forever because I love you too!
On this Day I wish you happy mother's day.

MOTHER'S DAY POEM

My mom is so sweet
She's a treat to the family
She's just like how I'm saying!
She's caring and sharing
She's the best mom I'm having!
Who teaches me, guides me,
Supports me, when I'm in problem!
She pampers me cuddles me
It's her love that I'm cherishing!
My mom is just adorable and,
To love her is just unstoppable.

SOCIAL MEDIA

Social media refers to all applications and website or blog that enable people around the globe to interconnect. It is a way to connect with more people virtually. It is a modern way to communicate with the people. We can express our thoughts through social media. Some of the common and widely used social media platforms are Facebook, Twitter, WhatsApp, Snapchat, Instagram and many other. India comes second in term of internet users in the world. Social Parties also take the help of social media to influence and divide the people on state and religious basis, but the effect of social media is debatable, but one thing that everybody would agree that social media is certainly enjoyable.
